The Problem We Were Solving

Pandemic Context

The pandemic forced SMBs to move sales online fast. Even businesses already using Google tools faced steep barriers: setup complexity, uncertainty about where to start, and no guided path forward.

Most entrepreneurs had the will — but not the way.

18% of offline SMBs said lack of digital knowledge was their #1 barrier to going online.

The Opportunity

- ✓ Google had millions of SMB customers already trusting its tools
- ✓ Loja Integrada offered a fast-to-launch, accessible store platform
- ✓ Together: ready-made audience + a frictionless launch path
- ✓ A co-branded initiative could remove the #1 barrier — complexity

PMM — Strategy Through Launch

I led the partner GTM from strategy through launch and adoption — connecting partner requirements, customer needs, and internal execution.

Partner Alignment

Captured Google's requirements, translated into a launchable GTM plan, and coordinated cross-team execution.

Positioning & Messaging

Crafted joint offer messaging that resonated with SMBs already inside the Google ecosystem.

Acquisition Funnel Design

Designed the full funnel: co-branded landing page → direct store creation, minimising friction.

Onboarding Journey

Built a personalised enablement path for Google customers focused on faster time-to-value.

Cross-functional Leadership

Orchestrated product, engineering, content, and marketing teams toward a single launch.

Five Pillars of the GTM Plan

01

Strategic Alignment

Captured Google's needs and customer expectations. Translated into a GTM plan and drove cross-team coordination.

02

Product Integrations

Partnered with tech to deliver direct Google-service integrations. Marketing promise matched in-product experience.

03

Co-branded Landing Page

Joint Google + LI page with clear CTA. Customers created their store directly from the landing page — zero detours.

04

Dedicated Onboarding

Personalised journey for the Google audience. Designed for faster time-to-value: setup → store live.

05

Live Education Sessions

Produced live classes during the pandemic. Education as both enablement tool and activation driver.

Acquisition & Activation Journey

A direct path: Google SMB audience → store live — minimising drop-off at every step.

Key insight: Removing steps is a growth lever — a direct landing-page-to-creation flow materially improves conversion.

Impact — By the Numbers

What Made It Work

Product + Promise must align

Partner GTM scales only when integrations and onboarding deliver exactly what the campaign claims. Misalignment kills trust and retention before it can compound.

Fewer steps = higher conversion

The direct landing-page-to-store-creation flow materially improved conversion. Every removed step is a growth lever — especially with a non-technical audience.

Education drives activation

Live, practical content reduced setup anxiety and accelerated the path to 'store live.' Education is simultaneously enablement and a retention strategy.
